

# FEL Frontiers 07

## International Workshop on Frontiers in FEL Physics and Related Topics

The goal of the workshop is to provide a forum for the presentation and discussion of new theoretical and experimental results on free-electron laser physics and related topics, such as Quantum FEL, seeding with HHG, CARL (Collective Atomic Recoil Laser), and advanced beam manipulations to optimize the FEL properties. The workshop is sponsored by INFN and ELETTRA, and supported by URLS and UCLA. It will take place at the Hotel Hermitage, on the beautiful Biodola Beach of the **Elba Island**, Tuscany, Italy, from September 8 to 14, 2007.
