

AGENDA  
SIDDHARTA COLLABORATION MEETING  
(Politecnico di Milano, Dipartimento di Elettronica e Automazione)  
Via Golgi 40, Milano  
December 16, 2004 9:00 a.m.-5:00 p.m.

- 1) Peter Lechner:
  1. Status of the SDD production
  2. Preparation of lab tests  
(probe station, spectroscopy)
  
- 2) Lothar Strueder:
  1. Definition of handling procedures
  2. Agreement on a QA/QC monitoring,  
documentation
  3. Results of the meeting in Vienna
  
- 3) Carlo Fiorini: Front-end electronics: development status
  
- 4) Catalina Petrascu: BTF results on the 30 mm\*\*2 SDD chip
  
- 5) Florin Sirghi: Stability measurements in Frascati lab  
with new shaper-charge amplifier
  
- 6) Mihai Iliescu: Preliminary DAQ layout
  
- 7) Mario Bragadireanu, Liviu Giurgiu: Design of a multi-channel  
high voltage control system for biasing  
the SDD detectors
  
- 8) Vincenzo Lucherini: Status of the kaon trigger
  
- 9) Hannes Zmeskal: Status of the SDD setup:
  - a) ceramic chip holder
  - b) gluing and bonding
  - c) cryogenic SDD mounting device
  
- 10) Hermann Fuhrmann: Quality control:
  - a) optical inspection
  - b) electrical test measurements
  - c) cryogenic test setup for X-ray  
measurements
  
- 11) A.O.I.
